Naveen Kumar P

8525926626 — naveenkumar.bio.info@gmail.com — LinkedIn — GitHub — Portfolio

Education

Sri Sai Ram Engineering College **Chennai, India**
B.Tech – Information Technology *2023 – 2027 CGPA: 8.06*

Gokilambal Matric Hr. Sec. School
Higher Secondary (12th Grade) *2023 93%*

Skills

Languages: Java, Python, JavaScript, SQL
Frontend: React.js, HTML, CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB , MySQL , Firebase Firestore
Tools & Platforms: Git, GitHub, VS Code, Postman
Concepts: System Design Fundamentals, OOP, DBMS, Computer Networking Fundamentals, AI Applications

Experience

Product Engineering Intern **January 2026 – March 2026**
CODEGRAMMER

- Developed structured video-based learning content using HTML, CSS, and JavaScript by converting provided transcripts and audio into interactive lessons.
- Built a WordPress plugin to connect recruiters and students, enabling job posting and application workflows.
- Integrated resume submission flow by leveraging an external resume-generation plugin for streamlined applications.
- Conducted product reviews of the platform, providing regular feedback and suggesting improvements to enhance usability and workflow.

Frontend Developer Intern **June 2025 – July 2025**
CODEHUNTERS

- Built and modified React.js UI components based on project requirements.
- Participated in code reviews and improved layout responsiveness.

Projects

AI-Powered Learning Tutor Platform | *React , Node.js, Firebase, Gemini, Groq*

- Built a full-stack platform that generates personalized courses, lessons, and quizzes using LLMs, implementing lazy generation and caching to minimize redundant API usage and improve scalability.
- Designed a modular backend with multi-provider AI integration (Gemini, Groq) and rule-based orchestration to handle different tasks (content generation, quizzes) with fallback support for reliability.
- Developed a rule-based adaptive learning system using user progress, quiz performance, and spaced revision logic to recommend next lessons, identify weak topics, and guide structured learning paths.

NullId – Anonymous Chat System | *React, Firebase, Web Crypto API*

- Developed a real-time anonymous chat application using React and Firebase, featuring end-to-end encrypted messaging with the Web Crypto API.
- Designed a privacy-focused user model with anonymous identities, selective profile visibility, and real-time communication powered by Firestore.

Interactive Portfolio with Custom Terminal | *React, Three js*

- Developed an interactive developer portfolio featuring a custom terminal interface for command-driven navigation, project exploration, and resume access.
- Developed reusable React components with optimized rendering and integrated Three.js-based 3D visualizations to deliver an interactive user experience

Publication

Quantum-Inspired Adaptive AI Tutor for Personalised Learning

- Presented at the *1st International Conference on Quantum Innovations for Computing and Knowledge Systems (QUICK'26)* – Organized by Vellore Institute of Technology (VIT), Chennai in collaboration with Deakin University, Australia | March 2026. https://doi.org/10.1051/epjconf/202636001020
- Proposed an adaptive learning architecture combining learner-state modelling with AI-driven content generation; explored quantum-inspired optimisation strategies for personalised quiz sequencing and instructional flow.
